

UI Design for a Better Craigslist

Team Member's Alex Landry, Laura Nguyen, Keith Thompson, Ben Tirado, Shiloh Sells

I. INTRODUCTION

Craigslist is an online classified platform that allows users to buy and sell goods, search for housing, find jobs, post services, and connect with various local communities. Although the platform remains popular due to its simplicity and accessibility, its current user interface (UI) has several limitations that hinder the user's experience. The outdated design, minimal visual hierarchy, and limited filtering tools can make navigation feel overwhelming and not intuitive for the average user. This proposal aims to redesign the Craigslist user interface to modernize its appearance, improve organization, and enhance usability while preserving the straightforward functionality that users value.

II. ISSUES WITH THE EXISTING UI / PROBLEM STATEMENT (FOR NEW DESIGNS)

The existing UI of the Craigslist App has several issues that need to be addressed:

- **Outdated UI:** The UI design looks dated and old. It is reminiscent of an early 2000's website and is not longer acceptable in the modern age.
- **Little to no imagery:** The overall website lacks images and other non text imagery. This makes the site too boring to look at.
- **Cluttered:** There is too much information on the screen at a given time. This makes it oftentimes hard to understand what is going on.

III. PROJECT GOALS

The primary goals of this project are to:

- **Redesign the main page :** Enhance the main landing page to make it more inviting and accessible.
- **Modernize the rest of the site:** Make the rest of the website more modern and appealing to users.

IV. PROPOSED UI

V. PROJECT TIMELINE

The project will follow the timeline below:

Deliverable	Due Date
Team Building	February 2nd, 2026, 11:59 PM
Project Proposal	February 15th, 2026, 11:59 PM
Development Research	February 22nd, 2026, 11:59 PM
Website Base	March 1st, 2026, 11:59 PM
Feature Additions	March 22nd 2026, 11:59 PM
Progress Report	March 26th, 2026, 11:59 PM
Tweaks/Troubleshooting	April 10th, 2026, 11:59 PM
Optional Feature Additions	April 24th, 2026, 11:59 PM
Project Deliverable	April 28th, 2026, 11:59 PM
Final Project Report	May 3rd, 2026, 11:59 PM
Final Project Presentation	Starting April 9th, 2026

VI. CONCLUSION

In conclusion, this project aims to redesign the Craigslist user interface to address existing usability issues and create a more intuitive and visually organized experience. By improving navigation, modernizing the layout and improving search and filtering features, the redesign will make it easier for users to find and post listings efficiently. These changes will support a smoother user workflow, improve user's satisfaction, and help Craigslist remain competitive in today's modern digital landscape.
